Der har været udsendt **43** spørgeskemaer.

Af disse er **28** blevet besvaret.

Question	Gennemsnit	Varians	Standardafvigelse
How many of the scheduled lessons (exercise lessons excluded) have you attended?	4.96	0.04	0.19

On average, how many hours per week do you spend on preparation for this course (exercise lessons excluded)?

Gennemsnit	Varians	Standardafvigelse
17.46	122.11	11.05

We would appreciate if you state the reasons for your answers!

Not relevant/Don't know: 14

The lecturer has stated the intensity and level of the course to be very hard, which is why it was needed to use many hours to prepare for the course the best possible way.

motivated to participate in the class discussions and homework exercises.

I have had 2 reexams which is why I have prioritised those instead of reading for this subject.

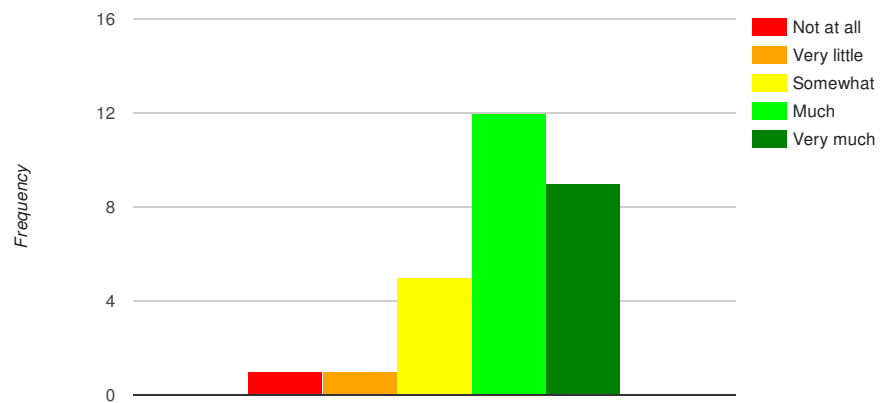

The learning experience is well done, and I feel that he really includes the students and makes it interesting to follow.

before class I used a lot of time to read the curriculum

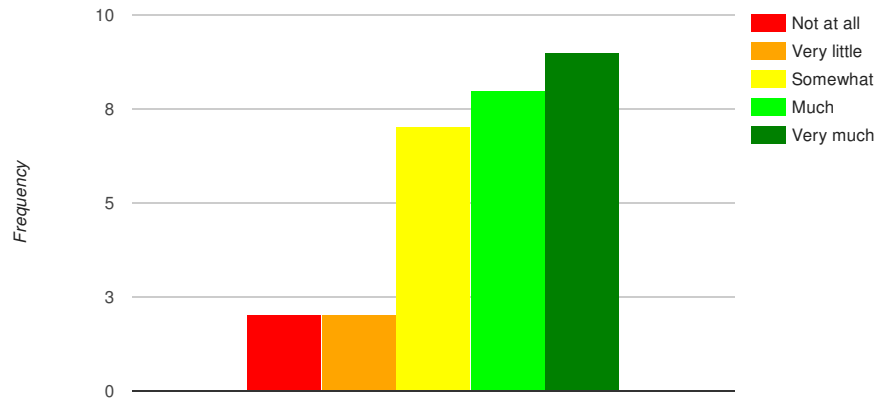

It's an intense course which makes us as students read and study a lot, so that we can follow the lectures.

Difficult topic

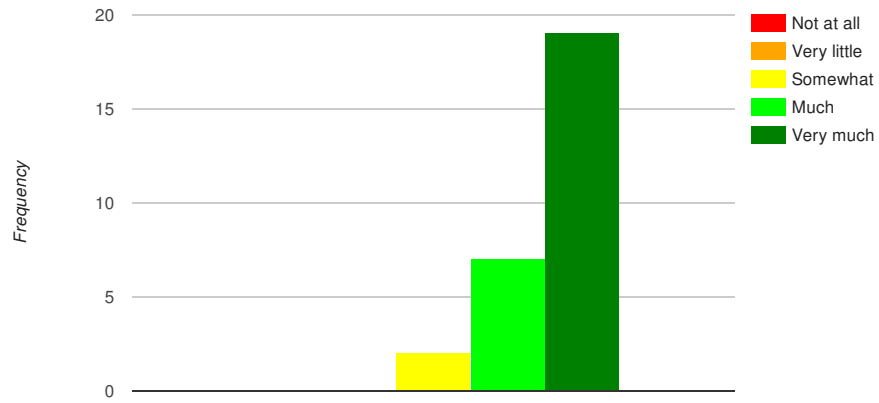

Tight schedule

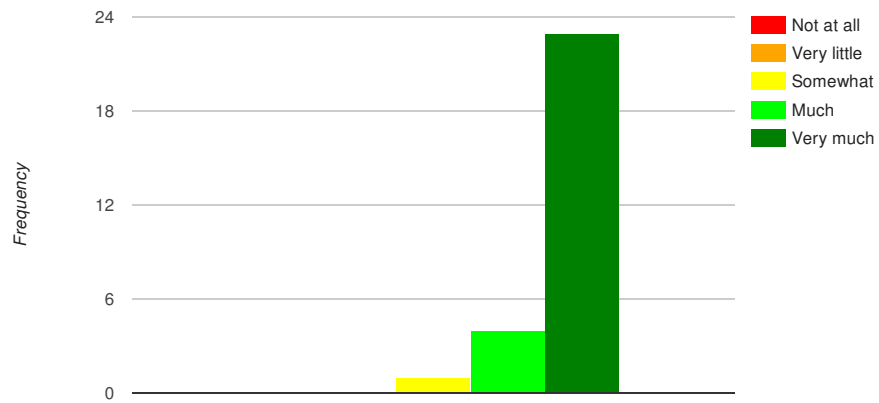

Question	Gennemsnit	Varians	Standardafvigelse
Are you familiar with the substance of the course description?	3.96	1.00	1.00

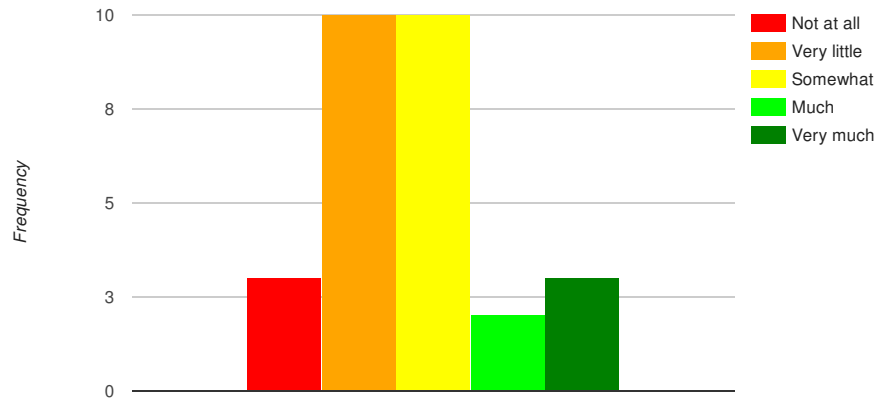

Question	Gennemsnit	Varians	Standardafvigelse
Has the course description been introduced by your lecturer?	3.71	1.47	1.21

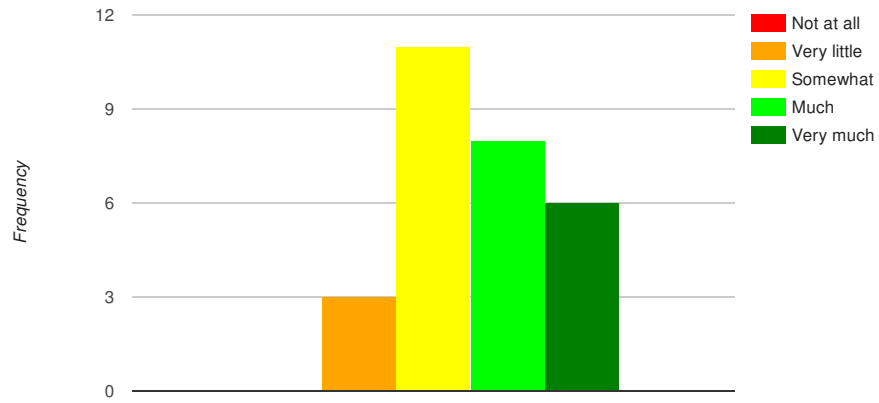

Question	Gennemsnit	Varians	Standardafvigelse
Have the selected texts (literature) facilitated a solid understanding of the subject?	4.61	0.40	0.63

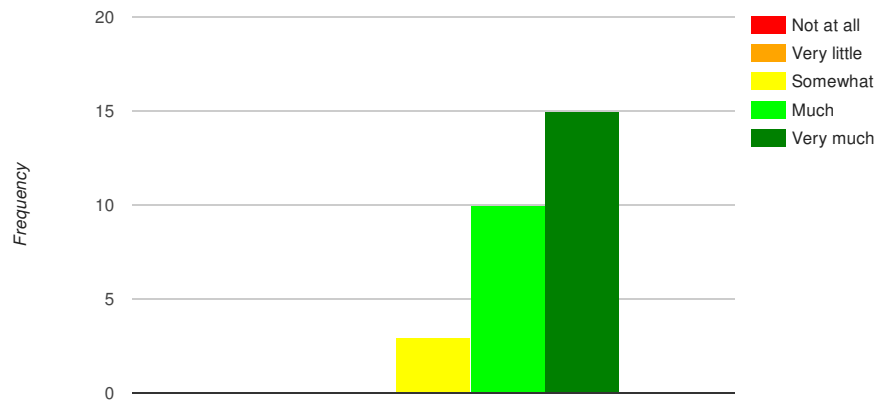

Question	Gennemsnit	Varians	Standardafvigelse
Have the selected learning activities and working methods facilitated a solid understanding of the subject?	4.79	0.25	0.50

Question	Gennemsnit	Varians	Standardafvigelse
Is the level of difficulty of the course too high?	2.71	1.25	1.12

Question	Gennemsnit	Varians	Standardafvigelse
Have you been informed about what is expected from you at the exam?	3.61	0.91	0.96

Question	Gennemsnit	Varians	Standardafvigelse
Can you tell the coherence between learning activities used in the course and the selected method of examination?	4.43	0.48	0.69

We would appreciate if you state the reasons for your answers!

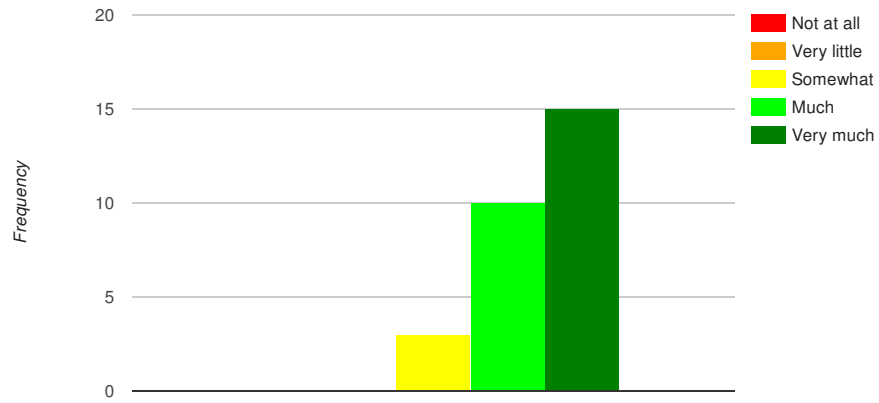

Not relevant/Don't know: 18

has been thorough with explanations of exercises and how to solve them.

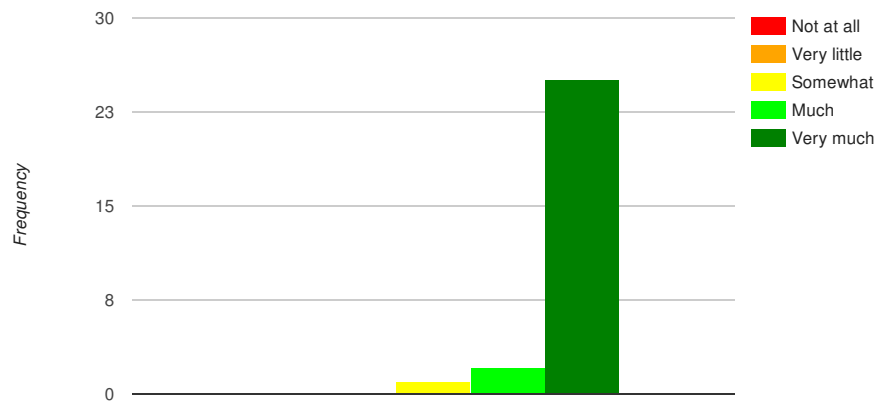

I like how we focus in exercises in the lectures. I feel they prepare me for the exam.

There has been a good variation between theory, assignments and practical caseworks

We will look at exam questions later - so I'm sure we will be more informed. At this point I believe that the exam will include questions such as in the problemset - but I do not know for sure, therefore I answer "somewhat"

Question	Gennemsnit	Varians	Standardafvigelse
To which extent have the selected learning activities motivated you to take an active part in the lessons?	4.43	0.48	0.69

Question	Gennemsnit	Varians	Standardafvigelse
Has the lecturer been good at facilitating and developing your comprehension of the subject?	4.86	0.20	0.45

We would appreciate if you state the reasons for your answers!

Not relevant/Don't know: 15

Karol is very good in explaining the stuffs that seems hard or confusing. Thus, they way he includes every one is something that is not seen in other lectures at the cand.oecon study. With a little bit sense of humor he makes the students maintain the focus in class from the very start to the end.

Very good at explaining, and understanding. Karol is good at including the student. makes the environment comfortable and has good vibes

The variation as mentioned before. And some humoristics during class makes it more interesting

The lecturer is really good at trying to involve and motivate the students to participate in the lessons.

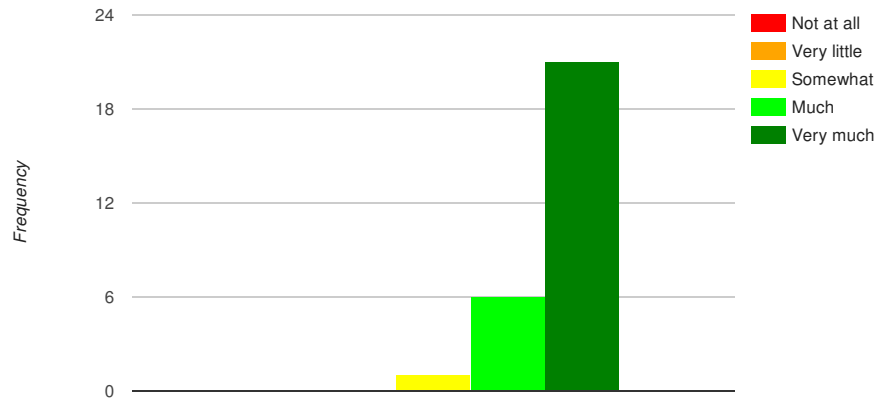

Karol is very including and helpful

I really like how the exercises are a part of the lectures

His involving the students in the discussions. It helps improve our understanding as students.

Great lecturer

The lectures are great! The teacher is very involved and brings real life examples which helped me at understanding the subject, he is also funny and always happy to help if we have any questions. One of the best teachers at SDU so far!

Question	Gennemsnit	Varians	Standardafvigelse
All in all, to which degree will you declare yourself satisfied with the content of the course?	4.71	0.29	0.53

Which elements in the lesson plan have, in particular, contributed to your learning outcome?

Not relevant/Don't know: 13

I think the way Karol is giving every student a chance to think about a potential answer to a potential question during class, is something that is very much appreciated. In these lectures Karol is not focused on the students answering correctly, but the students who actively attends and tries their best to answer the questions during class-discussions, for instance. Obviously, he wants the correct answer, but he makes space to those who may answer wrong, and by then helps the students to rationalize towards the right answer; ultimately making the student to attending class actively again. Eventhough this class is a intensive class with only 8 days lectures, Karol somehow makes the classes interesting and not monotone.

the examples and exercises with explanations in class

Exercises in class.

That we learn about the overall theory and then dive into exercises that goes into details.

Class activities and assignments

Working on problems in class and seeing examples of different questions (which I believe will be a like those in the exam)

I liked the lectures and the problems, cases and example we went through. I think that Karol is a great teacher, and succeed in making the course interesting.

The professors way to explain things. He's very calm, easy to understand and well prepared

We have used theory in real cases though additional reading. It's nice to see how the theory can be used in real world problems.

The class exercises and problem set

All

Class discussions, being able to ask questions
A nice, supportive, understanding, motivating and smart lecturer

Problem sets and in group discussions.

What could be improved in the course and in the lesson plan to increase your learning outcome?

Not relevant/Don't know: 18

maybe and overview of the expected HW exercises that is relevant for class and readings before class, and not the day before. but not a big problem.

Mere exercises. Going through old exam questions.

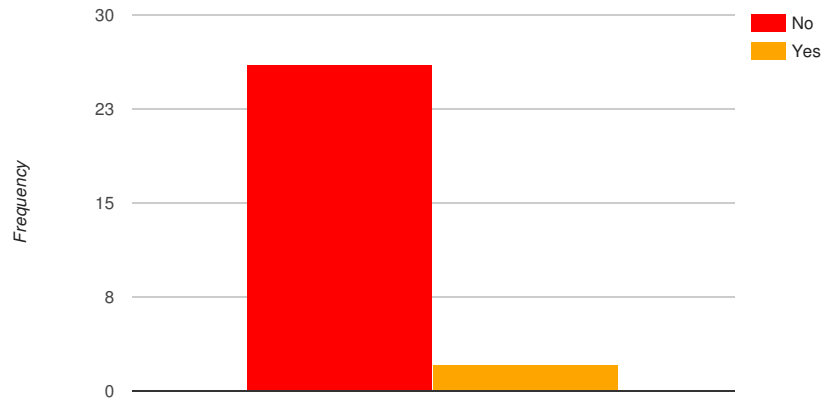

Seeing exam questions earlier in the course to see more of the "purpose" and understand how the learning will be used.

In some way I think that there might was to many/long breaks, but it was also nice.

Fewer class discussions on articles and more calculating exercises. 1 pr. day would be more fitting than 2/3.

More explanation

Hard to say. The teacher planned everything really well!

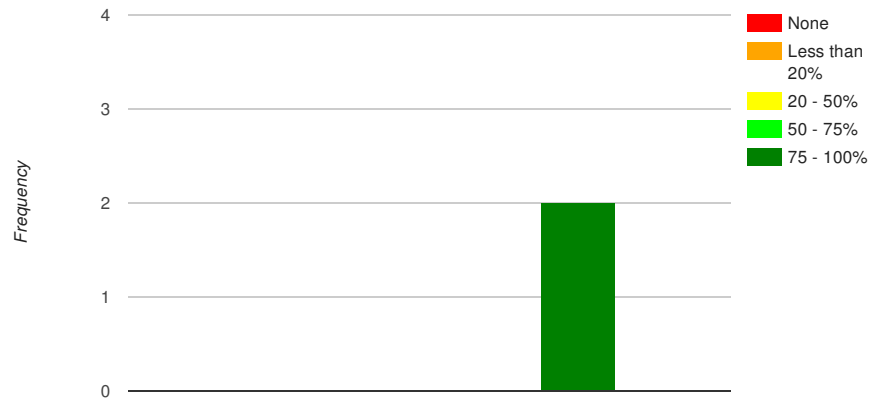

Question	Gennemsnit	Varians	Standardafvigelse
Has there been exercise classes associated with the course?	0.07	0.07	0.26

What is the name of your student teacher?

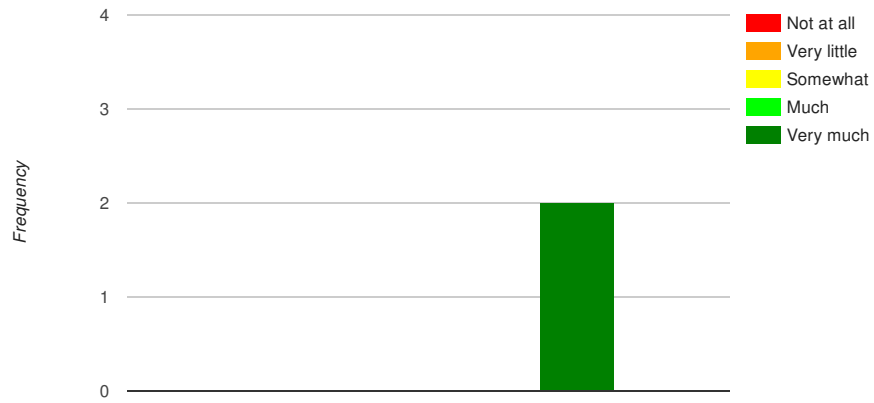

Not relevant/Don't know: 0

Karol Jan

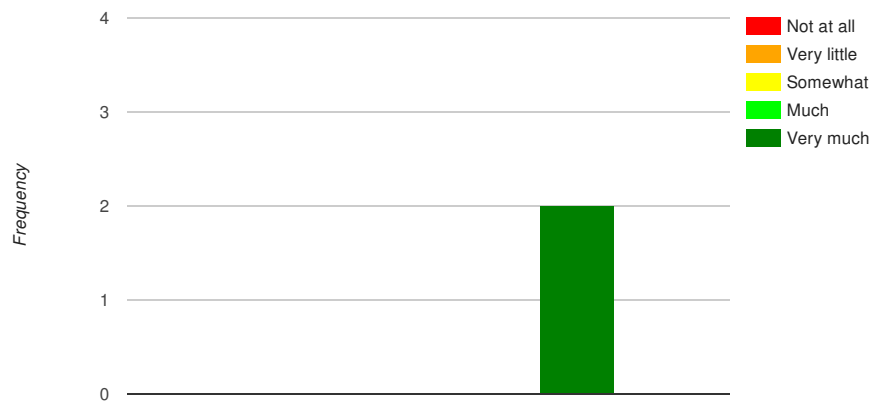

They are included in the lectures

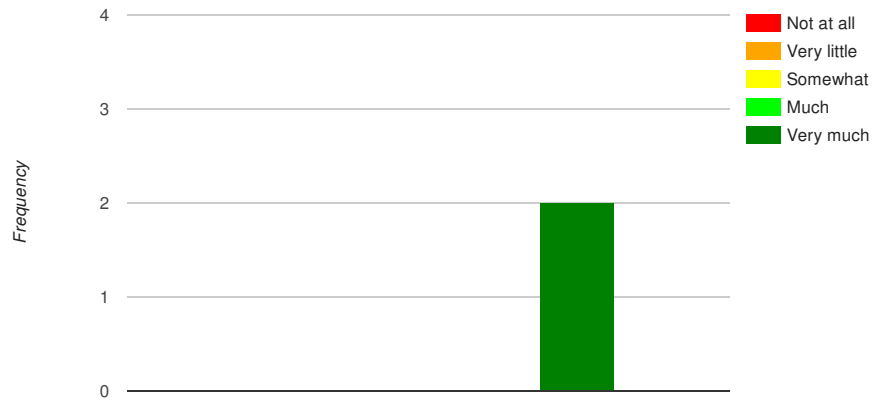

Question	Gennemsnit	Varians	Standardafvigelse
How many of the planned exercise lessons have you attended?	5.00	-	-

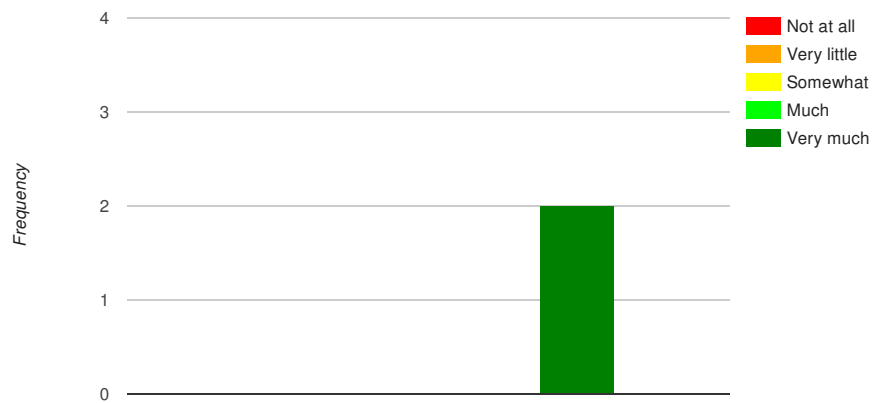

Question	Gennemsnit	Varians	Standardafvigelse
Can you tell the connection between the content in the lectures and the exercise lessons?	5.00	-	-

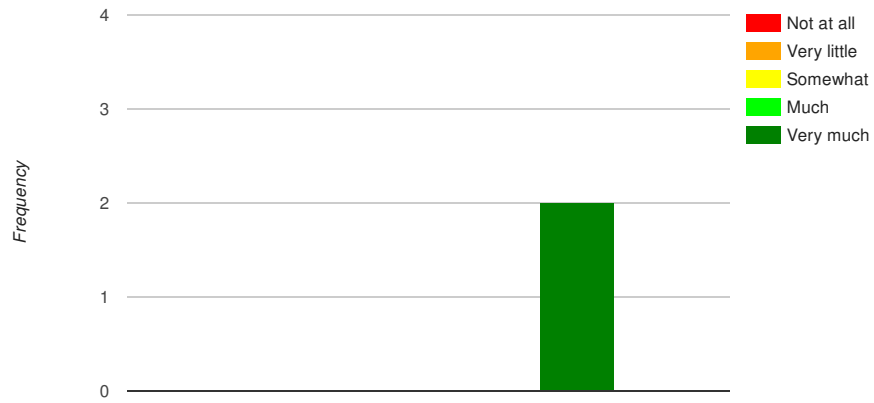

Question	Gennemsnit	Varians	Standardafvigelse
Did your participation in the exercise lessons improve your understanding of the subject?	5.00	-	-

Question	Gennemsnit	Varians	Standardafvigelse
Did your participation in the exercise lessons make you more competent in solving subject specific exercises or answering subject specific issues?	5.00	-	-

Question	Gennemsnit	Varians	Standardafvigelse
Did the student teacher appear well prepared and committed?	5.00	-	-

Question	Gennemsnit	Varians	Standardafvigelse
Was the student teacher good at communicating the subject matter and delivering relevant answers to exercises and subject specific issues?	5.00	-	-

Which elements in the exercise lessons have, in particular, contributed to your learning outcome?

Not relevant/Don't know: 2

What could be improved in the exercise lessons to increase your learning outcome?

Not relevant/Don't know: 2
